BHAUTIK RAKHASIYA

Full Stack Developer | Node.js · Express.js · MongoDB · React.js

+91 82387 40682 bhautikrakhasiya108@gmail.com linkedin.com/in/bhautik-rakhasiya

PROFESSIONAL SUMMARY

Full Stack Developer with ~2 years of experience building and delivering scalable, production-grade web applications using Node.js, NestJS, Express.js, React.js, and MongoDB. Strong expertise in backend architecture, RESTful and event-driven API design, webhook ingestion pipelines, and idempotent data processing. Experienced in implementing secure authentication using AWS Cognito and developing scalable, reusable React components with Role-Based Access Control (RBAC). Proven track record of building systems that process 1,000+ daily webhook events and manage 50,000+ data records efficiently. Skilled across the full development lifecycle, including database design, cloud integration, and responsive UI development, with a focus on clean, maintainable, and high-performance solutions.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, SQL
Backend	Node.js, Express.js, NestJS, RESTful API Design
Frontend	React.js, React Hooks, Responsive Web Design
Databases	MongoDB , MySQL
Cloud & AWS Integrations	AWS Cognito (Passwordless & MFA auth), AWS S3, AWS SES, AWS CloudWatch
Third-Party Integrations	YouTube Data API v3, PubSubHubbub Webhooks, WebSocket, Third-party REST API Integration
Tools	Git, GitHub, Postman

WORK EXPERIENCE

Software Developer · **Kevit.io — Rajkot, Gujarat** *Jun 2024 – Present*

YouTube Livestreaming & Video Synchronization Platform

- Architected and developed a YouTube livestreaming and video synchronization platform from scratch using Node.js, Express.js, and MongoDB, with iframe-based video streaming integration for individual users.
- Designed the backend architecture, database schema, and YouTube Data API integrations to support scalable and reliable data flow across distributed channel sources.
- Built an event-driven ingestion system using YouTube Data API and PubSubHubbub webhooks, handling 1,000+ webhooks daily for continuous, real-time video synchronization.
- Managed and synchronized 50,000+ videos across multiple pool players and pool halls YouTube channels, ensuring cross-channel data integrity and consistency.
- Implemented idempotent webhook processing to prevent duplicate data ingestion during retries, guaranteeing exactly-once consistency at scale.
- Integrated AWS Cognito passwordless authentication for secure user profile management; developed iframe-based video visibility logic to ensure accurate delivery across multiple frontend instances.

Digital Banking Portal Web Application

- Developed a Digital Banking Portal Web Application using React.js, focused on building clean, responsive, and scalable user interfaces with a strong emphasis on component reusability and maintainability.
- Integrated AWS Cognito on the frontend for secure user authentication, seamless session management, and protected route handling.
- Implemented Role-Based Access Control (RBAC) at the component level to ensure secure, context-aware UI rendering based on user roles and permissions.
- Built reusable and structured UI components to improve maintainability and consistency across the application.

EDUCATION

Bachelor of Engineering — Computer Engineering *2021 - 2025 | CGPA: 8.54*
V.V.P. Engineering College, Rajkot

Class XII — Science *2019 – 2021 | PR: 80.06*
Shri G.T. Sheth Vidhyalaya, Rajkot

Class X *2017 - 2019 | PR: 97.48*
Shri Mirambika Vidhyalaya, Rajkot
